## **Rogers, AR – October 1, 2019: SOLAR FEEDERS, INC. ANNOUNCES THE RELAUNCH OF THE INNOVATIVE MODEL SF2500 AUTOMATED SOLAR-POWERED LIVESTOCK FEEDER**

The new owner of Solar Feeders, Inc. today announced the relaunch of the Model SF2500 automated solar-powered livestock feeder. This revolutionary feeder allows cattle, goat and sheep producers to set a timer that dispenses the right amount of feed (up to 6 times daily) from a 2,500 lb. capacity bin into a 360° accessible stainless-steel trough.

Eliminating the labor intense practice of hand feeding, these feeders save livestock producers significant time and money, reduce waste and improve efficiency. Additional benefits include ease of livestock evaluation, safety and the ability to feed at night in order to significantly increase daytime calving.

Tisha Lackey, who runs a cow/calf operation in Corsicana, TX, states “The Solar Feeder #2500 solves a multitude of problems that small, weekend, and female ranchers face on a constant basis. It was the best purchase that I have made for my business and for me personally. I would 100% recommend this product to any producer. I used to spend the majority of my weekend just feeding and getting counts, now it’s a five-minute process. The savings on my feed costs, my personal health and safety, the improved condition of my cattle, just a few of the benefits have paid for the unit ten-fold. Not to mention, the best customer service I have ever experienced and just a phone call away. My husband is based overseas and it is more of a challenge to run a 45 head cow/calf operation as a single woman. You will not regret this investment!!”

The Model SF2500 comes standard with a trailer mount (3,500 lb axle), highway lighting, stabilizer pegs and a removable anti-theft 2” ball hitch. New on the SF2500 are 100% stainless steel hopper, upper and lower troughs. Also, standard on the SF2500 is a vibrating motor to improve feed flow.

For information on how to purchase a feeder visit us online at [www.solarfeeders.com](http://www.solarfeeders.com) or call 855-646-7123.

Solar Feeders, Inc. is based in Rogers, AR. All Solar Feeders, Inc. products are proudly Made in the U.S.A.
